LATERAL ARM AWNINGS

/ RESIDENTIAL AND COMMERCIAL

Folding arm awnings are perfect for overhead sun protection, minimising harmful UV rays and maximising heat reduction.

MAKING SHADE

MAXIMUM SUN PROTECTION, STRENGTH AND DURABILITY

FETUNA

The Fetuna Casette awning is architecturally inspired to allow a streamlined look when retracted. Designed in France and custom manufactured in New Zealand to withstand the harshest of environments.

Combining maximum protection and modern design where the fabric is completely protected from the elements.

HORIZON

Engineered using European technology with high quality aluminium, stainless steel componentry and built tough with an attractive warranty.

A valance adds a point of interest while an Aluminium hood can be added for a streamlined and protected finish.

GENERAL GUIDELINES
Making Shade awnings have been manufactured to provide you with years of hassle-free weather protection with very little maintenance. Retractable awnings should be used under supervision only as weather conditions can change quickly.

AWNING MAINTENANCE
Our Awning components are powder coated using Dulux powder coat systems. We recommend cleaning these and your fabric with a soft bristled brush and rinsing with water. Always ensure the fabric is dry completely before rolling it away and do not attempt to adjust or remove any awning components, trying to do so may result in personal injury or product malfunction.

FABRIC
We use the Docril fabric range which is a hard-wearing fabric of superb quality. It comes in an extensive 80 colours to blend in or stand out and has a 10 year UV warranty.

OPERATION
Manually operated awnings extend and retract using a crank handle.

Automated awnings simply extend and retract with the push of a button. Wind or Motion Sensors can be added with automated awnings which retract your awning during high impact conditions.

WARRANTY
Your awning comes with a five-year limited warranty on all hardware components of the system.
