

Often it is confusing to know which type of fabric to choose for your Outdoor Blind – Clear PVC or Mesh? We can help guide you through this process and ensure you get the result you are wanting to achieve. However, you may find this sheet helps answer some of your questions or prompts you to give thought to some differences between both materials.

PVC CLEAR	MESH
Full weather protection	UV protection
Blocks wind	Some airflow
Maintains temperature	Primarily blocks sun & glare
Clear view	Clocks up to 96% of wind & rain
Can mark, scratch and show dirt	In the day, provides privacy and restricts viewing into area from outside
Expands and contracts with changes in temperature	At night, cannot see beyond fabric from the inside. From the outside (especially if a light is on) can see in easily
Can create noise in wind	Strong & sturdy fabric which will stand up to heat waves, wind & rain, hail & frost without any damage
Can cloud & mist if rolled up wet although it will eventually disappear	Doesn't mark or scratch
	Range of colours to suit your design situation
	Motorisation available
