OPERATION

Easy to install and operate, the Gearbox blind provides effective sun protection, ease of use and style - an excellent option for all environments.

The blind can be simply lowered to the desired location and when completely down they can be fastened in position using a Stainless Steel clip. Gearbox blinds are easy to raise simply by releasing the fasteners and raising the screen.

GEARBOX BLINDS

/RESIDENTIAL AND COMMERCIAL

A great solution to get weather protection whilst on a tight budget.

FABRIC OPTIONS

MESH

Shadeview is a versatile stylish fabric range which protects you from wind, rain and harmful UV rays while optimising the view. Shadeview has a high shade factor blocking up to 97% of the sun's rays.

We offer 3 types of Shadeview Mesh—Classic, Urban & Extreme. These vary in openness, width, weight & warranty depending on your needs .

CLEAR PVC

A Clear PVC window complete with solid PVC border offers full weather protection and a clear view. Note that clear PVC does not create shade and requires more regular maintenance.

MAINTENANCE

Ensure blinds are not left midway when unattended. They either need to be fully retracted or fastened down. Powder coated hardware and fabric should be cleaned every 6 months with a soft sponge and mild household detergent.

Clear PVC requires careful cleaning as it is susceptible to scratching. Clean only with a soft cloth using mild soap and warm water.
