ZIPTRAK®

Guided track outdoor blinds are customised for each and every project to ensure you receive a strong, robust and long-lasting blind. With colour options to match or compliment your existing space, our outdoor blinds are discreet in installation and offer superior functionality without compromising your style. Instantly add another living space to your home where you can control airflow, light and temperature.

FABRIC OPTIONS

Shadeview Mesh diffuses light and optimise's your view, while protecting you and your home from the elements. Low maintenance and a stylish finish.

Clear PVC is also an option where an unobstructed view is paramount. PVC offers full protection blocking all wind and rain and maintains warmth.

ZIPTRAK® WIND RECOMMENDATION

Ziptrak® blinds are a strong, robust system and are commonly installed in coastal regions and locations prone to high winds. In windy conditions blinds should be left down and locked or fully retracted. During severe weather events, your blinds should be fully retracted.

ZIPTRAK® AUTHORISED FABRICATORS

Making Shade custom manufacture your blinds in-house and are authorised fabricators of all Ziptrak® Blinds. We receive premium support from a dedicated team of production and engineers to protect the Ziptrak® Brand.

MAINTENANCE

Ziptrak® Blinds require very little maintenance. From time to time you may wish to clean the blind with a soft cloth and soapy cold water (such as heavily diluted household detergent). Do not use a high-pressure hose to clean the blind.
