KEY FEATURES AND BENEFITS

- Catch the sun
- Shield the wind
- Create shade
- Close for rain protection and privacy
- Available in a wide range of powder coat colours
- 10-year warranty excluding natural disasters

SPECIFICATIONS

All aluminium louvres and extrusions used in our Louvre Shade are manufactured in an ISO9002 quality assured environment to AS1866 and AS3902 standards. We use marine grade T316 stainless steel for drive axles with stainless steel componentry as the standard for our fixings. The plastic injected moulded componentry is UV stabilised for excellent resistance.

For the powder coat finish we use Dulux Duralloy which provides added resistance against all weather conditions especially in coastal areas and those exposed to salt spray.

MAINTENANCE

Should your Louvre Shade become dirty we recommend carefully removing any loose debris with a wet sponge. Use a soft non-abrasive brush and mild household detergent solution to remove dust, salt and other deposits. Rinse off with clean fresh water.

Regularly check (every 3-4 months) the water drainage gutter for any build-up of debris which will cause overflow or blockages.

Your Making Shade Louvre Shade has been manufactured to provide you with years of hassle-free weather protection with very little maintenance.

We have a great gallery of photos!
