

KEY FEATURES AND BENEFITS

- 4 % Openness Factor
- High UV / Heat protection
- Mildew / Mould resistant
- Easy to clean
- Fade resistant
- Fire retardant
- Stainless steel fixings
- Retractable
- 85-100% UV Block
- Made to measure
- Premium fabric options

Wave Shade retractable shade offers a fresh alternative to traditional shade sails that are fixed in place and set in shape. The shapely billows bring an effortless style to outdoor areas with modern colours that naturally blend in and complement the existing style of your property. As we customise every installation, the Drop and Billow of your wave shade can be determined by you.

WAVE SHADE

/ RESIDENTIAL AND COMMERCIAL

Designed to retract when you want sun and extend when you need shade. Enjoy the sun on your terms with a stylish Wave Shade.

MAKING
SHADE

RETRACTION OPTIONS

Pole Retraction:

An aluminium pole hooks to a stainless steel cleat on the front spar of the Wave Shade to manually extend & retract.

Cord & Pulley Retraction:

Operates like a blind with a stainless steel pulley and lack polyester braid. This system allows you to lock the shade halfway.

FABRIC

We offer fabric options that have high levels of UPF/UVR/Shade to protect you from harmful rays with a 10-year UV warranty. Soltis 96 offers 4% openness for air flow and reducing heat. A fabric that drapes well and contains solar protection coating which extends the fabric's life.

MAINTENANCE

We recommend cleaning your wave shade components with diluted house hold detergent and a soft bristled brush, rinsing with water when finished. Always ensure the fabric is dry completely before storing it. Ensure it is retracted when winds exceed 32kph. A storm strap can be used to secure your wave shade during a storm or alternatively simply remove and store it.
