SHADE**

# ADJUST YOUR LIVING AT THE PUSH OF A BUTTON

Transform your outdoor space with Louvre Shade, the perfect solution for expanding your outdoor living area. We specialise in custom designing and installing Louvre Shade systems tailored to fit both compact spaces and large, intricate areas.

Whether you're enhancing your home's entertainment potential, creating a safe play area for children, or expanding your business capacity, Louvre Shade offers unparalleled versatility.

Our louvres allow you to optimize your outdoor environment regardless of weather conditions. With adjustable blades, you can capture sunlight, shield against wind and rain, regulate airflow, or create shade effortlessly throughout the day and year. For added protection or privacy, simply close the blades for a sleek, flat ceiling appearance.

Operating our Louvre Shade systems is seamless and quiet, thanks to advanced motorisation and remote control capabilities. This allows you to effortlessly adjust the blade angles with a simple button press. Rain sensors ensure that the roof automatically closes at the first sign of rain, providing peace of mind even when you're away from home.

We use high-quality, UV-stabilised components designed to withstand New Zealand's challenging climate. Our systems are finished with Dulux powder coat systems, ensuring durability and aesthetic harmony with your surroundings.

Elevate your outdoor space into a modern, all weather sanctuary by integrating blinds and LED lighting, creating an inviting atmosphere for any occasion.

#### LOUVRE SHADE FEATURES

- Catch the sun
- Shield the wind & rain

- Marine Grade Stainless Steel components
- UV Stabilised components
- Custom installation solutions
- Integrated LED lighting (optional)
- Internal gutter and water drainage system
- Rain sensor
- Motorised remote control allows for flexibility and control

## CREATE A ROOM

Ziptrak® blinds can be easily integrated into your Louvre System to increase the functionality of your outdoor living area.

Give yourself control over airflow, light and temperature whilst retaining a stylish and low maintenance space.

LED lighting can also be integrated as an unintrusive extra to further enhance your space.

## SPECIFICATIONS

All aluminium louvres and extrusions used in our Louvre Shade are manufactured to the highest standards. We use stainless steel componentry as the standard for our fixings. The plastic injected moulded componentry is UV stabilised for excellent resistance. For the powder coat finish we use Dulux Duralloy Plus which provides added resistance against all weather conditions especially in coastal areas and those exposed to salt spray.

## MAINTENANCE

Maintenance is minimal. With regular rinsing and clearing of the gutters your Making Shade Louvre will provide you with years of hassle-free weather protection. Periodic cleaning with warm soapy water and a sponge or soft bristled brush is all that is required to remove dirt, grime and salt deposits.

## WARRANTY

Your Louvre Shade comes with a 5 year workmanship warranty from date of invoice (excluding natural disasters). Motors and electronics have a 3 year warranty conditional on product care recommendations being followed.

Louvre Shade is designed for external use and is not a 100% waterproof solution.

We have a great selection of colours and fabric options available! Take a look online at [www.makingshade.co.nz](http://www.makingshade.co.nz)
