- Hard-wearing system has a 5 year warranty
- Electric or manual options
- Add wind sensor

### PRIVACY

Spring Arm awnings are streamlined with an easy to use design for everyday use. They can be lowered to give your windows privacy from neighbouring properties and main thoroughfares.

### FABRIC

We use Docril Fabric which is hard wearing and superb quality with an extensive colour palette.

### SOLAR PROTECTION

Window awnings are an excellent way to protect your carpet and furniture from harmful UV rays. In the warmer seasons they can significantly reduce cooling costs by blocking sunlight from entering through the window.

### OPERATION

Awnings can be manually operated with a crank handle or automated. Hardware components are made of powder coated steel to withstand harsh climate conditions.
