Our team of experts can guide you, so you get the best fit for your property within your budget requirements. Whether it is over Pergola or Under Pergola Shade you require we can manufacture and install a solution that is either permanent or retractable. We appreciate, sometimes winter sun is desirable, so we try to provide versatile solutions.

PERGOLA SHADE

/ RESIDENTIAL AND COMMERCIAL

Provides shade from the sun and can be either permanent or retractable for the winter months.

**MAKING
SHADE**

OPERATION

Gearbox operated shade allows versatility by simply winding your shade in or out when required. Alternatively, aluminium poles can be inserted at each end to create a more permanent fixture but still removed when desired. We use stainless steel fittings and attachments.

FABRIC

We offer fabric options that have high levels of UPF/UVR/Shade to protect you from harmful rays with a 10-year UV warranty. There are a wide range of colours to match your décor and enhance your outdoor space.

MAINTENANCE

We recommend cleaning our shade components and your fabric with diluted house hold detergent and a soft bristled brush, rinsing with water when finished. Always ensure the fabric is dry completely before rolling it away and do not attempt to adjust or remove any awning components, trying to do so may result in personal injury or product malfunction.
